

Module 2c - Exercise D: Community Resilience Plan

| # | Activities | Result | Options for adjusting so changing risks are taken into account? (if yes – describe how) |
|-----|---|---|---|
| 1. | Community Disaster Action Team (CDRT) established – ready for disaster (flood and fire) preparedness and response and first aid assistance | - 7 person trained and equipped | |
| 2. | Establishment of flood response & evacuation plan (regularly updated) | - All Households (HH) know evacuation route and safe places | |
| 3. | First Aid training to CDRT + additional volunteers | - >6 person trained and equipped - volunteers provides immediate treatment and care to injured people | |
| 4. | Plantation 300 plants (bamboo, and various shrub species) along the selected parts of the river and at 5 local water source catchment areas | - Protect 5 water sources catchment - Protect 0.5 ha cultivated land | |
| 5. | Establishment of physical protection wall approx. 40 meters along river shoreline and 2 water source catchment areas | - Protect 2 water catchment area - Protect 10 HHs - Protect 2.5 ha cultivated land from river erosion | |
| 6. | Awareness on Landslide, Flood, Fire prevention through posters | - 140 persons aware - 2 wall paint in village - Poster stitching in 70 HHs | |
| 7. | Awareness on safe house construction, fire-limiting construction material, and unsafe zones along rivers | - new houses will be built safer – and on safer sites | |
| 8. | Early warning system to households near the rivers | - 5 person trained on conduct early warning - 30 HHs receive early warning information | |
| 9. | Conduct drill on fire response, to reduce fire risk and increase awareness | - 70 person aware on fire disaster risk reduction | |
| 10. | Establishment of emergency fund collection system to disaster-affected person/HHs | - emergency fund of 500\$ in place | |
| 11. | Enhance water management and distribution | - Make one plan and policy | |
| 12. | Skill and tools to renovation and construction of water supply to community tap stands | - 2 person trained and equipped | |
| 13. | Watershed, water catchment and water supply unit cleaning | - Clean 6 water source and water supply unit | |
| 14. | Awareness campaign on water borne diseases like Diarrhea, Dysentery | - 70 person aware on water borne disease | |

| | | | |
|-----|---|--|--|
| 15. | Find alternative water resources | - Find >1 alternative water resource | |
| 16. | Renovate main community Water supply | - 56 HHs use sufficient water | |
| 17. | Establishment of sanitation units (Family latrines) | - 39 families use safe latrine facilities | |
| 18. | Village clean-up programme (Garbage management) | - No garbage anywhere - Safe and clean community - limit mosquito breeding grounds | |
| 19. | Pit excavation for garbage management (1 pit/HH) | - Garbage thrown in pit | |
| 20. | Coordination and support to build improved cooking stove | - 30 HHs use of improved cooking stove - reduced respiratory diseases | |
| 21. | Health awareness and training on malaria risk in rainy season | - 70 HH aware of malaria risk and preventive relevant measures | |
| 22. | Conduct HH level visit session on reproductive health, child health and immunization | - 10 pregnant women aware in safe child birth - 70 person aware on women & child health, health facilities provide by health post | |
| 23. | Mobilize families for child immunization when next health department vaccination campaign is rolled out | All children under 5 are covered by standard immunization | |
| 24. | Street drama on health and sanitation on effects and prevention technique | - 70 person aware how to improve sanitation system | |
| 25. | Irrigation canal renovation work (400 meter) for upper part of community and 400 meter for down part of community | - 20 ha fertile land gets irrigation facility | |
| 26. | Interaction and awareness on animal disease and simple treatment | - 70 person aware and known about animal disease and simple treatment | |
| 27. | Awareness session on forest management: controlled grass cutting, wood cutting etc. | - 70 person aware of forest management | |
| 28. | Actively participate on Government, NGO, CBOs activities: send proposals to local government | - Coordination with line agencies - Easy to implement disaster risk management plan | |
